Concentrating  
planned  
offensive

1 2 - like a plotter bringing  
where their weapons /  
defensive / offensive  
measures are taken

types of weapons  
utilization & targets

22

Main person is wearing civilian clothing.  
 Briefing person is wearing military  
 uniform and using ~~an indicator~~  
~~to~~ pointer to indicate location,  
 etc. of weapon systems. Thus in  
 room are mixture of military &  
 civilian (military outnumbering)  
 The person has more oval  
 features than round.

I'm getting the impression that  
 some of the ~~weapon systems~~ <sup>systems</sup> have been previously undetected  
 and if discovered will  
 create inter-national  
 repercussions.

SDI

Building is located in a populated Cold War city.  
It is of newer construction than those around  
it, but not outstanding in appearance. It  
contains communication rooms, operations rooms  
with a lot of people, a closed (vault-type door)  
monitoring room and a room very much like  
a war room, which is being used for  
briefing. 10 men, mostly military are in  
this room. The main or most important  
person is wearing civilian clothing. He  
is being briefed by a man in a military  
uniform, who is using maps and <sup>33mm.</sup> slide  
projections to show location (geographical-  
Eastern Europe & Middle East) of weapon systems.

The room is circular. If one were in  
a round chair (which is being used

24  
by the main man, he can do a 360° survey of  
the room. The room is dark & windowless.

~~Also basing~~ The brief is showing where  
the weapon systems are located, utilization and  
possible targets/efforts. There is great concern  
about previously undetected locations becoming  
known, which could have international  
repercussions. There are SDI-type weapons.

4 Locations E. Europe  
more concerned about the  
one's in the Middle East.  
No known connection  
of support.
